ANGELS' LOVE

INTRODUCTION

Having an awareness of spiritual energy doesn't mean you have suddenly gone gaga or away with the fairies. It simply means you have an affiliation with nature and an appreciation for all of life. With some people it starts from when they are very young when people would have maybe described them as 'sensitive'. These people as children find it hard going at times as they have to adapt to the harshness of life here in a world where it's a case of toughen up or be picked on, at worst bullied. Most choose to toughen up as anyone will back me up on this,

particularly if they have grown up in an inner city, for example London. But they never lose their love of nature. This includes, trees, flowers, plants, animals, the sea, rivers, the sky and eventually love of fellow members of the human race! I say eventually because many sensitive people are natural loners, who are happy with their own company and usually quickly acquire an empathy with healing energies.

It's often the way that later on in life they become healers in one way or another. Some become nurses, doctors, carers, therapists or spiritual healers.

Cynicism and gossip are two of the most damaging things in our world today and I

am told by my guides in spirit that we are not being self-righteous when we try to avoid passing on juicy gossip or being cynical when someone tells us of an event that obviously makes them happy in their lives. Words such as self-righteous are merely words when they are mis-used against another and that simply knowing that we are acting from love within our hearts for the good of all humanity is all we need to know.

I have included some of my channelled spiritual information at the back of this book, that I hope the truth seekers of spirit and soul and life on earth among you will enjoy reading.

Meanwhile Love, Light , Happiness and
Many Blessings to you All along Your Life

For ease of reading I will refer to God in this book as 'my mentor' or 'God Source' or just 'Source' these descriptions will cover the 'higher power' who converses with me on a regular basis.

We are Guided

1. Colin Fry

The Guide who has been with me for the longest time is without doubt Kim who was a doctor friend of mine in spirit before I came to earth. But my most recent guide who has joined me is Colin Fry who passed on to spirit on the 25th August 2015. Many people will remember him from his television show. I am indebted to Colin who has kept me informed and amused with his typical anecdotes on life in general but now helps bring through loving spirit family members and friends to my clients during readings. Anyone who has watched Colin's live performances will I am sure

agree that Colin is so down to earth and often comical with his delivery that you just have to smile or even laugh out loud.

I just had to laugh one day even though I had been breathing in smoke that would appear out of the blue every now and again. Let me explain. It seemed around an hour after being up and about that I would smell the smoke sometimes so strong it would sting my nostrils! So I asked Colin was it a spirit causing it. He asked me did I not consider that it was him. He said he was sorry for getting smoke up my nose, but I just laughed and said that it's okay now I know. I would simply turn on my air purifier until the smoke went. I

had assumed that he'd given up smoking but apparently he told me that when we pass on to the spirit world we can still enjoy the experience of smoking or drinking alcohol on the spirit side of life. He went on to say that it was a bit of a signature tune of his as he loved a fag when he was on our side of life!

After speaking with Colin for a while I asked him about his own life on the other side. He told me that life in spirit is as we, mediums always imagined it is. Many mediums including myself only get a glimpse of spirit side of life during meditations so it was good to receive that valida-

tion. But he went on to add much more to this.

He told me he doesn't sleep, or drink anymore but he does like the experience of drinking water. So definitely no beer or alcohol there apart from the experience of it. He goes places where there is water and drinks in the atmosphere and experiences drinking fresh water. He says:

“Until I lose this desire it will remain.”

I asked him to describe his passing but he took this opportunity to remind me of the importance of breathing as it not only helps us relax but also for sensing the presence of spirit. He told me that the honest truth is that we should respect breathing as it's

such a precious earthly necessity but one that he abused regularly in his lifetime due to his smoking cigarettes and adding that his connections with spirit were so very profound that he took his breathing for granted. Another time I spoke with Colin he described Heaven from where he is in spirit and he told me this:

“Each soul here has a different experience. With me, now I see the beauty Chris of how it all was created and continues to exist. Okay there is no yesterday but I’ll use earth’s yesterday seen from our side. Before me is the choice to spend some *time* (*bear in mind there is no time though!*) with Tony (Tony Stockwell, the medium) or help

with budding mediums, as there's a few that I help regularly who are on my number one list! I do those rounds so to speak. "

"I concentrate on where and who I speak with and consult with Magnus first. Then, and sometimes when I first came here he would be with me. So we check with our minds on what's needed to tell the medium. After I have passed on those messages I am free to go visiting places I want to visit."

"Sometimes I go to my old home in Haywards Heath in Surrey and Sweden. My family who are here or Brighton's old haunts or best of all I go to the countryside
